## EDUCATION

### University of Cebu

BSIT - Bachelor of Science in Information Technology.

- 2022-2025

### Asian College of Technology

Technical-Vocational Livelihood Information and Communications Technology

- 2019-2020

## EXPERIENCE

### Itech-Rar Solution Inc • OJT – Junior Developer

Technology stack: PHP, Laravel, MySQL, HTML CSS, JS, jQuery, January 2025 – May 2025

- Develop and maintain school management systems, including Learning Management Systems (LMS) and online school platforms, for multiple academic institutions such as Bright Academy, Mary Chiles College, SHS-Hijas Sacred Heart School, and others.
- Collaborate with a team of developers using PHP Laravel frameworks to build, optimize, and enhance web-based school systems.
- Participate in data entry tasks to ensure accurate and up to date records of student and school data.
- Implement and maintain CRUD (Create, Read, Update, Delete) operations across various systems to manage academic data efficiently, utilizing PHP Laravel, MySQL, and jQuery DataTables.

### CornerStone AutoSales • Graphics Designer & Car Agent

Technology stack: Capcut, Facebook, Facebook, Instagram 2019 – Present

- Developed creative and technical editing skills by using CapCut to produce and edit promotional videos for marketing campaigns.
- Enhanced graphic design proficiency through creating visually appealing social media content using Canva, specifically for automobile promotions.
- Gained hands-on experience in digital marketing by managing Facebook and Instagram accounts for CornerStone Auto Sales, including posting, responding to inquiries, and engaging with customers.
- Built photography and videography skills by capturing high-quality media of automobile units for use in advertising and social media.
- Improved interpersonal and sales communication skills through direct conversations with potential clients, both online and in person

### Discovery Bible Ministry • Virtual Assistant

Technology stack: Google Workspace (Sheets, Docs, Gmail), Microsoft Office, Dashlane January 2024 – April 2025

- Provided administrative support and assisted in daily operational tasks for the ministry.
- Utilized Google Sheets for maintaining and organizing data, including Bible word translations and various database entries.
- Used Google Docs for content writing, documentation, and internal communication drafts.
- Managed and coordinated emails via Gmail, ensuring timely responses and organized communication with ministry partners and customers.
- Assisted with spreadsheet tasks using Microsoft Excel, and ensured secure access to tools and accounts through Dashlane.

## PROJECTS

### Cruddies – A test CRUD operation.

Full-stack Developer March 2025 – Present

Technology used:

HTML/CSS, TypeScript, Angular, AppScript, Google Spreadsheet

It was developed to practice full stack development using free and accessible tools. The project is deployed using free resources, demonstrating how a functional CRUD system can be implemented without traditional servers or paid hosting.

### Basic User Rest API

Backend Developer March 2025 – Present

Technology used:

TypeScript, Firebase

A simple REST API built with TypeScript for user login and registration, using Firebase as the database.

### Renthings – Online Rent Items

Frontend Developer January – April 2025

Technology used:

HTML/CSS, TypeScript, Angular, Nodejs, MySQL

Renthings is an online platform for renting items, built with Angular, TypeScript, Tailwind CSS, and DaisyUI for a sleek user interface. It uses Node.js on the backend to manage item listings, rentals, and user interactions.

### JuanBayan – Online Crowdfunding System.

Frontend Developer June – Nov 2024

Technology used:

HTML/CSS, TypeScript, Angular, Nodejs, MySQL

JuanBayan is an online crowdfunding system developed using the Angular framework, with a Node.js backend and MySQL for data management. It enables users to create, support, and manage fundraising campaigns efficiently.
